| I | reflecting this in the IT plan/annua | al budgets and forecas | ts. |
| <u></u> | | | |
| Skills, Kr | nowledge, Experience & Qualifica | tions: | |
| | | | |

Essential:

- Minimum of 5+ experience in at least two IT solution development disciplines, including technical or infrastructure architecture, application development, or cloud development
- Previous experience developing architecture blueprints, strategies, and roadmaps.
- Documented experience and a strong working knowledge of the methodologies to conduct threat-modelling exercises on new applications and services.
- Practical knowledge of the information security standards domain.
- Experience of working with external audit and certification organisations
- Familiar with the ISO27001 standard
- Knowledge of the NIS regulation and NCSC cyber assurance framework (CAF)
- Knowledge and understanding of digitalisation in a regulated environment. Experience of scoping and managing competing and complex projects.
- Understanding and knowledge of system development life cycle methodologies (such as waterfall, piral, agile software development, rapid prototyping, incremental, synchronize and stabilize, and DevOps)

Desirable:

- Bachelor's degree in computer science, information-technology, engineering, system analysis or a related study, or equivalent experience
- Previous experience of working as part of a Distribution Network Operator.
